DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 85-117, drawn to a method of making a sol-gel material

Group II, claims 118-136, drawn to a method of introducing and separating a substrate using a sol-gel material

Group III, claims 137-170, drawn to a sol-gel containing device

The inventions listed as Groups I to III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

While all groups contain the same special technical feature, “a polymerized sol-gel material (PSG); and linking an enzyme to a surface of the PSG via a covalent linkage”, this feature, while shared between all three Groups, does not offer a contribution over the prior art, as evidenced by Ekström et al. (“Integrated Microanalytical Technology Enabling Rapid Protein Identification”, *Analytical Chemistry*), who discloses a silicon microchip with a PSG material and an enzyme covalently linked to the surface of the PSG (pg 288, “The μ -chip IMER”).

2. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
